

## Mad Catz® Takes Flight with New Range of Saitek® Pro Flight Products

### *Combat Rudder Pedals, Throttle, Pitch & Mixture System and Backlit Information Panel Set To Debut at 2010 Farnborough International Airshow*

**San Diego, July 23, 2010**

Mad Catz® Interactive, Inc. (“Mad Catz” or “the Company”) (AMEX/TSX: MCZ), a leading third-party interactive entertainment accessory provider today confirmed plans to attend the 2010 Farnborough International Airshow taking place at the Farnborough International Airshow Aerodrome, UK from July 19 through to July 25 2010.

Located at **Stand A2** in **Hall 3**, Mad Catz invites visitors to experience the thrill of professional flight simulation, with a full replica cockpit on hand housing the very latest in Saitek Pro Flight hardware which gamers and enthusiasts can try out for themselves.

As part of planned events for the Farnborough show, Mad Catz plans on unveiling three new products from the Saitek Pro Flight range to the general public for the very first time.

Timed to coincide with the airshow, Mad Catz also plans on celebrating the launch of the new range with a new Saitek website. Located at [www.saitek.com](http://www.saitek.com) the new website, anticipated to launch on July 24, offers simulation enthusiasts a fresh, informative and regularly updated destination for their favorite hobby.

Full information on the new range of Saitek Pro Flight products is as follows:

- **Saitek Pro Flight Combat Rudder Pedals**

Fully compatible with all major flight simulation titles, the **Saitek Pro Flight Combat Rudder Pedals** add comfort and realism to any pre-existing flight simulation set up. Inspired by pedal designs found in modern fighter aircraft such as the F16 or F35, the **Rudder Pedals** are constructed from a highly robust Di-cast alloy, providing durability and authenticity for the most demanding of aspiring flight-sim pilots. Independent left and right brake axis allows for greater accuracy and precision when performing braking maneuvers. Self-centering rudder axis works in conjunction with a user configurable dampening adjuster, allowing users to define levels of pressure required to operate rudder controls. 3-way adjustable pedal angle allows for a bespoke flying experience,

while optional foot plate provides extra comfort during flight. Powerful Saitek ST software allows users to fully configure their **Rudder Pedals** with software of their choice. The **Rudder Pedals** are ideal for use with the Saitek X65-F and X52 H.O.T.A.S. Pro Flight Systems and are compatible with Windows™ 7, Vista™, XP™ and XP64™.

*MSRP: \$199.99 / £179.99 / €199.99*

- **Saitek Pro Flight Throttle, Pitch and Mixture System**

Fully compatible with all major flight simulation titles and pre-existing flight simulation set ups, the **Saitek Pro Flight Throttle, Pitch and Mixture System** replicates the control surface found in light aircraft, such as the Cessna®, Piper® and Money Bravo®. Three durable aluminium rods allow users to accurately alter throttle, pitch and fuel mixture levels and an additional 9 fully programmable toggle switches provide a host of user defined controls during flight. Complete with mounting clamps which allow users to secure to a desk or flat surface, the **Throttle, Pitch and Mixture System** is compatible with Windows™ 7, Vista™, XP™ and XP64™.

*MSRP: \$149.99 / £129.99 / €149.99*

- **Saitek Pro Flight Backlit Information Panel**

Compatible with Microsoft® Flight Sim™ X and Flight Sim™ 2004, the **Saitek Pro Flight Backlit Information Panel** provides users with clear and authentic information during flight. Supplied with over 70 individual 'command tiles' which display a wide variety of in flight commands and information, users can customize their **Information Panel** to display flight information relevant to their aircraft or personal preference. In addition, users can assign a choice of three colors to each or the 24 segments, allowing different command tiles to light up with different colors during flight. Command tiles not illuminated remain invisible to the naked eye, allowing aspiring flight-sim pilots to accurately access the information they need, when they need it. Standard Pro Flight mounting brackets are supplied, ensuring full compatibility with other 'Panel' products in the Saitek Pro Flight range. Complete with powerful Saitek ST software, allowing users to fully configure their **Backlit Information Panel**. Compatible with Windows™ 7, Vista™, XP™ and XP64™.

*MSRP: \$149.00 / £129.99 / €149.99*

Darren Richardson, President and Chief Executive Officer of Mad Catz commented, "Building on years of innovation and quality, our new range of Saitek Pro Flight products illustrates our continued commitment to the flight simulation community. We believe the new products announced today bring realism, authenticity and excitement to Pro Flight enthusiasts."

The new range of Saitek Pro Flight products are expected to ship world-wide beginning October 2010.
