

## Mad Catz HUD Troubleshooting (v. 38 Upgrade.)

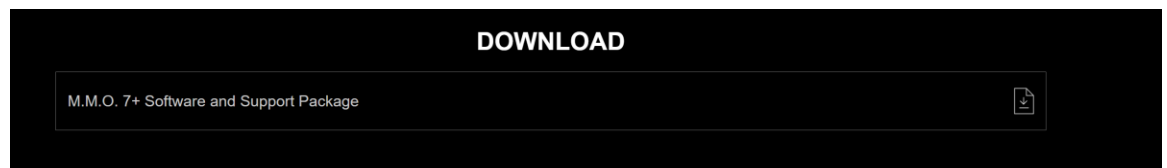

Dear MMO 7+ user, we've recently made substantial changes to the H.U.D. based on user feedback. In some cases, upgrading from v.36 -> v.38 will cause the new H.U.D. to not open after updating.

In this case, please follow the following process to restore functionality.

1. Go to Apps & Features (Windows key -> type : apps and click on this: )

2. Uninstall H.U.D.
3. Manually remove the residual files in the old installation directory:  
C:\Program Files (x86)\mcz\MadCatz H.U.D\
4. Download the newest version of H.U.D. from the website

<https://www.madcatz.com/En/Product/Detail/mmo7-plus>

5. Install the new v.38 H.U.D. from the software package.
6. Get back in the game!
